

I would like to comment on digital radio on FM. I am a long time (40 years) listener to distant FM educational stations. I listen from both my home and with a FM antenna (4 ft omni) on top of my car. I am troubled that I could no longer receive my favorite stations, which are 75 to 150 miles away (at home) and up to 125 miles away in my car. I listen to WHRO, WCPE WCVE, WUNC WETA and the Roanoke Station all regularly.

Already you have allowed many religious stations to broadcast on the same frequency as three of these stations within 200 miles of these stations, and often much less. We are losing our HISTORICALLY FREE ACCESS TO EDUCATIONAL FM STATIONS which have unique programming. I am also concerned about LOW POWER FM.
